IMAGE AND VISION COMPUTING

Index to Volume 9
Numbers 1–6
Pages 1–408

1991

Author index

Aloimonos, J Y and Tsakiris, D P On the visual mathematics of tracking 235
Atherton, T J see **Langley, K** 296
Austin, W J, Wallace, A M and Fraitot, V Parallel algorithms for plane detection using an adaptive Hough Transform 372
Bell, S B M and Holroyd, F C Tesseral amalgamators and hierarchical tessellations 313
Benson, P J and Perrett, D I Synthesizing continuous tone characteristics 123
Bhatnagar, D, Pujari, A K and Seetharamulu, P Static scene analysis using structured light 82
Blake, A and Cipolla, R Robust estimation of surface curvature from deformation of apparent contours 107
Brady, M see **Lee, S** 39
Brown, C see **Forsyth, D** 130
Brown, C see **Rygol, M** 33
Cipolla, R see **Blake, A** 107
Cocquerez, J P see **Monga, O** 203
Davies, E R Alternative to abstract graph matching for locating objects from their salient features 252
Deriche, R see **Monga, O** 203
Dickson, W Feature grouping in a hierarchical probabilistic network 51
Dubois, E see **Konrad, J** 215
Ellison, T P and Taylor, C J Calculating the surface topography of integrated circuit wafers from SEM images 3
Enkelmann, W Obstacle detection by evaluation of optical flow fields from image sequence 160
Fairwood, R C Recognition of generic components using logic-program relations of image contours 113
Faugeras, O D see **Zhang, Z** 10
Fiebig, M see **Nichol, D** 139
Fiebig, M see ***Nichol, D*** 362
Fleet, D J see **Jepson, A D** 338
Forsyth, D, Mundy, J L, Zissermann, A and Brown, C M Projectively invariant representations using implicit algebraic curves 130
Fraitot, V see **Austin, W J** 372
Frisby, J P see ***Mclauchlan, P F*** 20
Goldberg, N Colour image quantization for high resolution graphics display 303
Harris, C Structure-from-motion under orthographic projection 329
Hason, O see ***Meisels, A*** 151
Healey, G Estimating spectral reflectance using highlights 333
Hess, H see **Meisels, A** 151
Holroyd, F C see **Bell, S B M** 313
Hutber, D see **Marshall, A D** 385
Jepson, A D and Fleet, D J Phase singularities in scale-space 338
Jou, I-C see **Ju, R-H** 194
Ju, R-H, Jou, I-C and Tsay, M-K Zooming techniques on digital Chinese character patterns: a further study and improvement 194
Konrad, J and Dubois, E Comparison of stochastic and deterministic solution methods in Bayesian estimation of 2D motion 215
Langley, K, Atherton, T J, Wilson, R G and Larcombe, M H E Vertical and horizontal disparities from phase 296
Larcombe, M H E see **Langley, K** 296
Lee, S and Brady, M Integrating stereo and photometric stereo to monitor the development of glaucoma 39
Malandain, G see **Monga, O** 203
Marangelli, B Data preprocessing for adaptive vector quantization 347
Marshall, A D, Martin, R R and Hutber, D Automatic inspection of mechanical parts using geometric models and laser range finder data 385
Martin, R R see **Marshall, A D** 385
Maybank, S J Ambiguity in reconstruction from image correspondences 93
Mayhew, J E see **Mclauchlan, J E** 20
Mayhew, J E see **Pollard, S** 58
Mayhew, J E see **Thacker, N A** 27
Mclauchlan, P F, Mayhew, J E and Frisby, J P Stereoscopic recovery and description of smooth textured surfaces 20
Meisels, A, Hason, O and Hess, H Quantification and abstraction: low level tokens for object extraction 151
Monga, O, Deriche, R, Malandain, G and Cocquerez, J P Recursive filtering and edge tracking: two primary tools for 3D edge detection 203
Mundy, J L see ***Forsyth, D*** 130
Nag, H see **Schalkoff, R J** 5
Nichol, D and Fiebig, M Image segmentation and matching using the binary object forest 9
Nichol, D and Fiebig, M Tracking multiple moving objects by binary object forest segmentation 362
Novak, M M Improved rendering of the Lorenz equation 169
Oakley, J P and Shann, R T Efficient method for finding the position of object boundaries to sub-pixel precision 2
Perrett, D I see **Benson, P J** 3
Pollard, S, Porrill, J and Mayhew, J E W Recovering partial 3D wire frames descriptions from stereo data 58
Pollard, S see **Porrill, J** 45
Pollard, S see **Rygol, M** 33
Porrill, J and Pollard, S Curve match and stereo calibration 45
Porrill, J see **Pollard, S** 58
Preston, K (jr) Three-dimensional mathematical morphology 285
Pujari, A K see **Bhatnagar, D** 82
Reed, T and Wechsler, H Spatial/spatial-frequency representations for image segmentation and grouping 175
Rosin, P T and Ellis, T Frame-based system for image interpretation 353
Rygol, M, Pollard, S and Brown, C Multiprocessor 3D vision system for pick and place 33
Schalkoff, R J and Nag, H Decomposition and parallel architecture for the geometric transformation of digital images 275
Seetharamulu, P see **Bhatnagar, D** 82
Shah, A V see **Thazhuthaveetil, M J** 88
Shann, R T see **Oakley, J P** 262
Stephens, R S 66
Taylor, C J see **Ellison, T P** 3

Title index

Alternative to abstract graph matching for locating objects from their salient features 252
Ambiguity in reconstruction from image correspondences 93
Automatic inspection of mechanical parts using geometric models and laser range finder data 385
Calculating the surface topography of integrated circuit wafers from SEM images 3
Colour image quantization for high resolution graphics display 303
Comparison of stochastic and deterministic solution methods in Bayesian estimation of 2D motion 215
Curve match and stereo calibration 45
Data preprocessing for adaptive vector quantization 347
Decomposition and parallel architecture for the geometric transformation of digital images 275
Determining motion from 3D line segment matches: a comparative study 10
Efficient method for finding the position of object boundaries to sub-pixel precision 262
Estimating spectral reflectance using highlights 333
Feature grouping in a hierarchical *probabilistic network* 51
Frame-based system for image interpretation 353
Image segmentation and matching using the binary object forest 139
Improved rendering of the Lorenz equation 169
Integrating stereo and photometric stereo to monitor the develoment of glaucoma 39
Multiprocessor 3D vision system for pick and place 33
Obstacle detection by evaluation of optical flow fields from image sequence 160
On computing all solutions to the motion estimation problem with exact or noisy data 229
On the visual mathematics of tracking 235
Optimal combination of stereo camera calibration from arbitrary stereo images 27
Parallel algorithms for plane detection using an adaptive Hough Transform 372
Parallel Hough Transform algorithm performance 88
PC-based system for transparent fluid film monitoring 100
Phase singularities in scale-space 338
Probabilistic approach to the Hough transform 66
Projectively invariant representations using implicit algebraic curves 130
Quantification and abstraction: low level tokens for object extraction 151
Recognition of generic components using logic-program relations of image contours 113
Recovering partial 3D wire frames descriptions from stereo data 58
Recursive filtering and edge tracking: two primry tools for 3D edge detection 203
Robust estimation or surface curvature from deformation of apparent *contours* 107
Semi-analytic method for estimating stereo camera geometry from matched points 75
Spatial/spatial-frequency *representations for image* segmentation and grouping 175
Static scene analysis using structured light 82
Steroscopic recovery and description *of smooth textured surfaces* 20
Structure-from-motion under *orthographic projection* 329
Synthesizing continuous tone characteristics 123
Tesseral amalgamators and hierarchical tessellations 313
Three-dimensional mathematical morphology 285
Tracking multiple moving objects by *binary object forest segmentation* 362
Vertical and horizontal disparities *from phase* 296
Zooming techniques on digital Chinese character patterns: a further study and improvement 194
